

ELEVATE YOUR WELDING GAME

WITH FLEXIBLE WELDING AUTOMATION

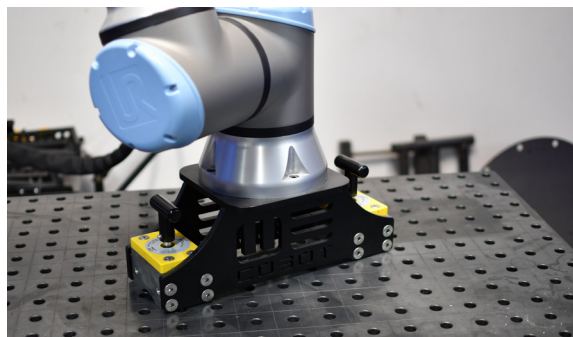

AUTOMATION & FACTORY SOLUTIONS

Simple Programming

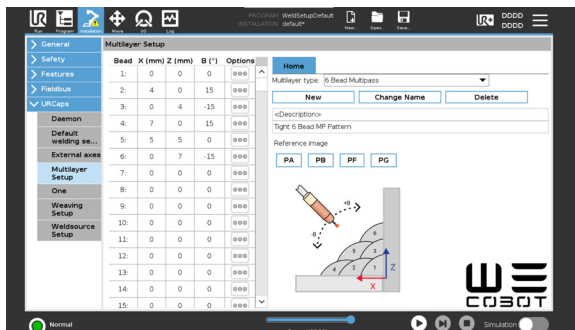

Program and control the robot directly from the end-of-arm tooling. Teach points, change modes, and operate with ease—designed by welders, for welders.

Quick Release Magnet Base

Enables rapid deployment and repositioning of the cobot system across multiple cells, tables, or large assemblies. Easily adapts as production needs change.

Advanced Program Features

Intuitive programming with advanced welding features like MultiLayer, Weaving, Seam Tracking, and pattern repeats—easily customized and built by welders for welders.

Built for Flexibility

Change processes, parts, and programs in minutes, with simple control and flexible automation.

VIRTUAL WELDING DEMO

Request a virtual welding demo to see how easy it is to set up welds and discuss the feasibility for your specific applications.
