Smarter Cobots. Seamless Integration. Real Results.

GCG delivers cobot solutions that simplify automation across machine tending, palletizing, packaging and welding applications. Whether you need hardware components or full turnkey integration, GCG's team is here to support your needs.
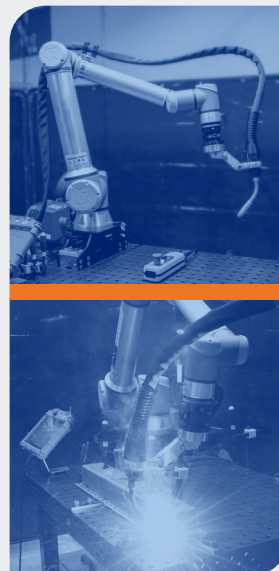

Machine Tending

- CNC Machines
- Inspection Systems
- Press Breaks
- Injection Molding Machines
- Automated Processes
- Material Handling
- Material Removal

Welding

- Advanced Welding Software
- Super Simple Programming
- Powerful Welding Functions
- Multipass, Seam Tracking
- Flexible Setup with Mag Base

Palletizing & Packaging

- Easy Handling
- Flexible Setup
- High Reach and High Payload Options

Cobot Center of Excellence

Powering, connecting and automating your world

GCG | AUTOMATION & FACTORY SOLUTIONS

Cobot Solutions that Work Smarter.

Experience the GCG cobot advantage, where fast deployment, low cost and unmatched flexibility meet deep automation expertise. Our cobot solutions are designed to accelerate ROI, streamline your operations and reduce manual, repetitive tasks. Discover why cobots are a perfect choice for you.

The Cobot Advantage

Faster Deployment
Installs take days, not weeks

Lower Cost
More savings and quicker Return on Investment (ROI)

Flexibility
Automation as flexible as your business

User-friendly
Easy to master interface

Quick ROI
Lower cost and less barriers to entry

Specialized Cobot Integration

Cobot-focused Expertise
Ensuring the best automation fit

Proven Process
Accurate and timely execution

Advanced Simulation Tools
Issues are avoided in the early design stages

Custom Built
A perfect-fit solution means the most efficient results

Turnkey Automation
Full integration capabilities to your process or machine

Component or Complete
We can support anywhere on the spectrum from turnkey to hardware-only

Support You Can Count On
Long-term success with nationwide engineering support

Fastest Path to Payback

Lower Total Cost, Faster Time to Production
ROI starts building quickly on day one

Reallocate Resources
Reduce mundane, dangerous and repetitive tasks

Avoid DIY Pitfalls
Eliminate costly trial and error, ensuring a faster and smoother startup

In-depth Knowledge Transfer
Gain the skills and confidence to run and adapt the system

Investment
Realized return on full capitol investment around 1 year for most projects
